

WATCHU
SECURITY

Welcome to Watchu Security

Our mission

Watchu Security aims to lead the way in an ever-changing industry as a security systems integrator. We deliver end-to-end security and surveillance solutions, from system design to installation, nationwide.

Our Solutions

A security system is only as good as its most vulnerable point. At Watchu, we take a holistic approach to delivering security solutions that can help reduce costs, minimise risk and optimise protection for your company.

Our team will carry out a full security survey of your premises to assess your specific requirements at no cost.

We will assess both your exposure to risk and your need for compliance with legislation and regulations where required. We will then tailor a bespoke security system that uses the latest industry products and services to your requirements.

Our range of systems includes intruder detection, access control and CCTV systems from all major manufacturers. Security leasing, maintenance and monitoring services, as well as full integration of the above, are just some of our services we can offer.

At Watchu Security, the on-going reliability of the systems we install is just as important as its function at the start. With a host of maintenance options, and other related support services, Watchu has your company's security needs covered.

Our Services

Packages

- Data Infrastructure / Wireless Data Installations

Response

With a technician network throughout New Zealand we provide the highest level of service and response throughout in the country.

Maintenance

Without regular maintenance even the most effective security equipment can deteriorate. So, it's important to have your security systems checked annually by a qualified technician to ensure your equipment is working properly. Meeting current standards giving you the peace of mind your system would be less likely to foul or develop faults. Our maintenance package also guarantees that if you do have a problem, our fully qualified technicians are available for support.

Alarm systems: Intruder alarms are the start of any electronic security offering. From the basic to the advanced, Watchu Security has a solution to fit your needs and budget. All our alarm systems can be monitored through your phone line or via our web-based Apps. We can also build smoke detectors into your security system thus ensuring they are powered, backed up by battery and monitored by the alarm system, for fast response to fire.

CCTV: Closed Circuit TV surveillance (CCTV) now lies at the heart of almost all electronic security systems. Watchu Security has a proven track record in delivering CCTV solutions across all industry sectors. Whether you are upgrading your existing CCTV or starting from new, Watchu Security offers a complete end-to-end solution. These include system design, product specification, video management / storage solutions, remote monitoring and system integration.

Access control: Whether you are embarking on a new access control system or considering migrating and/or enhancing your existing access control system, we can meet your needs. Our products are designed to embrace the ever-changing security technology business with access control systems ranging from stand-alone through to complex multi-site installations.

Perimeter security (Gallagher Power Fence Partners): Protecting the perimeter of a site can be the most fundamental element of a security system. Perimeter Intruder Detection (PIDS) is a complex area of the security industry and for the most secure organisations, this is part of an exceptional degree of capability that is required. Watchu Security has been developing perimeter security solutions for some time and we are proud to have worked across some of the most highly secured sectors of industry and government. Our aim is to offer maximum security protection for our clients at all times.

Gate manufacture and automation: At Watchu Security we design, manufacture and install a full array of gates for both residential and commercial clients. We provide gates that suit and protect either your home or business, with gates that are automatic and fully electrified for high security. Our team have the experience and knowledge to get it right.

Data Infrastructure / Wireless Data

Installations: If your business needs reliable, fast and functional networking and cabling that can cope with ever increasing rates of data flow, you need the support of an expert team to install and design your system. Whether putting together a completely new cabling installation, or getting the best out of a current one with upgrades, extensions or active equipment fittings, Watchu Security can provide a comprehensive and professional service that really delivers your requirements.

About Us

Founded in 2007, Watchu Security Ltd is a New Zealand owned and operated company.

We deliver cutting edge technology to the New Zealand security systems industry. A dedicated team of technicians, with years of expertise in both security and systems, have cemented our reputation in our business.

Our continued growth is founded on our belief in supplying excellence in specification and service to our customers.

With bases in Auckland, Cambridge and Christchurch, Watchu Security provides services to an ever-growing, nationwide client base of both large and smaller commercial organisations, industrial plants and government departments.

Working alongside the leading suppliers in the industry our staff are trained and accredited to the highest level.

Our values

1. We take pride in leading the way in the security industry
2. We guarantee our clients will receive only the highest quality of service
3. We take care and responsibility for the work we carry out for our clients
4. We value our staff, and our staff value our clients
5. We are committed to ongoing, annual staff training to ensure technical expertise
6. Health and Safety is built into our culture

"Watchu Security have worked across our various sites and I have always found them to be professional and very capable in providing our security needs." **Kim Wilson** | Wilson Properties
